Art Unit: 1651

The amendment received 1/5/05 has been entered and claims 1, 3, 6, 12, 13 are currently pending in this application.

In view of the amendments to the claims, the rejection of record under 35 USC 112, second paragraph, is hereby withdrawn.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 6, 12, 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

"Excluding an addition of any inhibiting agents which inhibit the degradation of brain natriuretic peptide" is new matter and is not supported by the specification as originally filed. No support for this newly added negative limitation is found in the specification.

Applicants argue that excluding the addition of aprotinin is supported by the specification, however, that is not what has been newly added to the claims.
